PROFILE SUMMARY

passionate and highly motivated software developer with a strong foundation in programming, full-stack development, and problem-solving. Proficient in Python, Java, and C, I have gained practical experience in building web and mobile applications, managing databases, and performing data analysis. As a fresher, I am eager to translate my academic knowledge into impactful real-world solutions. I possess strong analytical thinking, effective communication skills, and a commitment to continuous learning and self-improvement. Highly adaptable and enthusiastic about collaborating with teams, learning from experienced professionals, and taking on new challenges. I am confident that my dedication, proactive attitude, and technical skills will enable me to contribute meaningfully to organizational goals while growing into a valuable asset for the company.

SKILLS

Programming Languages: Python,React, C , Dart, SQL,Html,Css,javascript

Frameworks: Django,Bootstrap,flutter

Database: MySql,Postgresql,SQLite

AI Tools: Chatgpt,Gemini,Perplexity,Claude

Other Tools: GitHub,VS code, PyCharm,Xampp,Wamp,Kubernetes,Docker,Plesk,C Panel

Soft Skils:Problem-solving,Time Management,Collaboration,Communication,Adaptability,Leadership,Teamwork

EDUCATION

BACHELOR OF COMPUTER APPLICATION Jun 2022 – Mar 2025

CALICUT UNIVERSITY

Centre for Computer Science and Information Technology (CCSIT VADAKARA)

JUNIOR SOFTWARE DEVELOPER Jun 2020 – Mar 2022

K K M G V H H S (VHSE),KERALA

EXPERIENCE

PYTHON FULL STACK DEVELOPER Oct-2025- Present

Rru Media

- Worked as a Python Full Stack Developer handling real-time live projects from concept to deployment.
- Developed dynamic and responsive web applications using Python backend and modern frontend technologies.
- Handled API integration, database management, authentication systems, and deployment workflows**.**
- Created professional creatives and UI designs using Adobe Photoshop .
- Managed social media accounts, including content planning, posting, and engagement optimization.
- Ensured website performance, security, and scalability across multiple projects.

PYTHON FULL STACK INTERNSHIP May 2025 – Aug 2025

Inmakes Infotech -kochi

- Completed a comprehensive internship focusing on Python Full Stack Development.
- Worked with Django framework for backend development and RESTful API integration.
- Developed and deployed frontend applications using React with responsive design principles.
- Gained hands-on experience with PostgreSQL for database management and query optimization.

FLUTTER INTERNSHIP Sep 2024 – Dec 2024

Futura Labs -Calicut

- Used state management like Provider or Block to handle app data.
- Fixed bugs and improved app speed and performance.

PROJECTS

Attendance Management System ashiiin24/ATS

- An AI camera-based attendance management system utilizes face detection and facial recognition technologies to automatically identify and record individuals attendance recorded by students app.staff using the attendance desktop application
- Used by : Django-Python,Flutter-Dart,SQL-SQLyog,CNN-Face Detection

Tasker ashiiin24/Task app

- Developed a Tasker application to manage daily activities and personal productivity.
- Implemented **To-Do module** for adding, editing, completing, and tracking daily tasks.
- Designed **Daily Reporting feature** to log user activities and track progress.
- Built a **Mess Food Tracker module** for monitoring daily food consumption.
- Enabled users to mark food intake with tick-based selection for each day.
- Managed user-wise data tracking ensuring accurate individual expense calculation.
- Implemented automatic **daily and monthly amount calculation** based on food entries per user.
- Designed clean and user-friendly interface for easy daily usage.

  Ensured data accuracy and optimized database queries for performance.

Wedding Hub ashiiin24/wedding page

- Developed a comprehensive Wedding Album web application with multi-role access using Django.
- Implemented **three modules**: Super Admin, Admin (Studio/Clients), and User (Bride & Groom) .
- Admin module enables studios to manage clients, upload wedding photos and videos, and customize albums.
- Implemented **live wedding media upload/streaming feature**, allowing users from other countries to view events in real time.
- Implemented secure **website sharing feature** allowing relatives to view albums via shared links.

Event Booking Ticket ashiiin24/EventBooking

- Developed a full-stack Event Booking and Ticket Management system using Django.
- Integrated database models for users, events, bookings, and ticket records.
- Built responsive UI using HTML, CSS, and JavaScript.
- Optimized database queries for efficient booking and ticket retrieval.
- Implemented user authentication, event listing, and event detail pages.

E_Hospitality ashiiin24/E_hospitality

- Developed and deployed a Django-based healthcare management system (E-Hospitality) integrating patient, doctor, and admin modules with secure authentication, appointment scheduling, and e-prescriptions.
- Implemented patient record management, billing & payments, and facility administration using MySQL/PostgreSQL backend and deployed the application on PythonAnywhere for real-time access.

CERTIFICATIONS

- PYTHON (Riss Technologies)
- Introduction to Computers and Operating Systems andSecurity(Microsoft-Coursera)
- Node. js from (Udemy)
- Introduction to Networking and Cloud Computing (Microsoft-Coursera)

ACTIVITIES

- Volunteer,National Service Scheme(2020-2022)
